

Quick Ways To Relax

Breathe Deeply

Breathing Exercise

1. Slowly blow up the balloon
1 2 3 4
2. Now, slowly blow out the balloon
1 2 3 4

You can help slow down your body and quiet your mind by breathing deeply. Here is one way to try deep breathing:

- › Imagine you have a balloon in your tummy. Place one hand below your belly button
- › Breathe in slowly through the nose for four seconds
- › Feel the balloon fill up with air – your belly should expand
- › When the balloon is full, slowly breathe out through your mouth for about four seconds
- › Your hand will rise and fall as the balloon fills and empties
- › Wait 2 seconds, and then repeat a few times
- › When belly breathing, make sure the upper body (shoulders and chest area) is fairly relaxed and still

Visualize A Calm Place

- › Find a quiet place and close your eyes
- › Think of the most calm, peaceful place you have ever been. Picture yourself in that place
- › Describe what it: **Looks** like, **Sounds** like, **Smells** like, **Feels** like
- › Return here when you are feeling stressed or worried

Relax Your Muscles

- › Make a fist with each hand, squeeze each hand tight. Squeeze... Squeeze... Squeeze... Relax
- › Now, while you squeeze your fists again, tighten your arms to squeeze your body, Squeeze... Squeeze... Squeeze... Relax
- › Now, this time also squeeze your legs together while making a fist and squeezing your arms together, Squeeze... Squeeze... Squeeze... Relax
- › Repeat if you would like
- › Shake out your hands, arms and legs. Hopefully now you feel more relaxed
